

AWS Advanced Tier Status | AWS Partner Of The Year 2026

FROM BIGQUERY TO AWS LAKEHOUSE MIGRATION

Customer Story: Migrating Yggdrasil from BigQuery to AWS

Simplifying the platform with an open
foundation for analytics & AI

YOUR TRUSTED CONTACTS AT GOSTACK

Krišjānis Beitāns

Lead Data Engineer

krisjanis.beitans@gostack.eu

Delivery had become the bottleneck

Growing complexity made each new use case harder to deliver

Limited data context

Unclear lineage, ownership, and incomplete documentation

Platform dependency

Limited engine portability, upgrade pressure, and pricing exposure

Architecture complexity

Many processing patterns, fragmented orchestration, multi-cloud infrastructure

How it was

How growing complexity led to the project

RESULTS

Simpler architecture accelerated delivery

Less platform work. More product work.

Time to production

From weeks to **Days**

Data availability

120min > **15min**

Data platform costs

Reduced by 60%

Simpler delivery engine

11 ||||| → ||||| **4**

Ingestion	4 > 2
Compute	3 > 1
Orchestration	4 > 1

Yggdrasil's Lakehouse

We rebuilt how the platform is developed and operated

More than an architecture migration

SQL-first processing

Spark workloads rewritten as scalable dbt models on Athena

Structured data models

Medallion layers, documentation, tests, and clear lineage

GitOps delivery

Reviewed, versioned, and repeatable releases for models and workflows

How we got there

Maintain 2 platforms to keep business processes intact while gradually switching over services

GOSTack's AWS Lakehouse

A scalable and cost-efficient AWS data storage and processing platform.

01

Lakehouse Foundation

A scalable and cost-efficient AWS data storage and processing platform.

02

Incremental Migration

Priority data domains migrated without disrupting existing business processes.

03

Data Quality & Governance

Clear ownership, documented business logic, testing, lineage and controlled access.

04

Analytics & AI Readiness

Trusted and reusable data products for reporting, self-service analytics and future AI adoption.

FROM ONE MIGRATION TO A REPEATABLE BLUEPRINT

One journey. A repeatable pattern.

The technologies may change.
The decisions and migration pattern do not.

RECOGNIZE YOURSELF?

Who is this for?

Data outside AWS

Two clouds, two bills, two skill sets — while the business consolidates on one

Multiple tools, no platform

Every team bought its own solution — nothing talks to anything

Simple requests take weeks

A new data source shouldn't need a project plan

Engineers maintain, not build

Half the team's week goes to keeping legacy pipelines alive instead of shipping

Done with lock-in

The next platform runs on open standards — so the next migration is a choice, not an escape

Unlocking AI on your data

Chat with your data, RAG over your documents, models trained on your truth — all start with the same foundation

Unpack GOSTack

How we
operate

1

Reuse

2

Adapt

3

Extend

What we
aim for

1

Unified

2

Portable

3

Simplified

Data Blueprints

See full catalog >

Our offer

Free assessment

Clear view of your current state and opportunities.

Workshop

Dive deeper into your priorities, challenges and opportunities.

Pilot

Test, learn and validate before moving to full delivery.

Engagement

Expand and move into full implementation.

- ✓ Project-based delivery
- ✓ Team extension
- ✓ Managed service

Why GOSTack

CORE SPECIALIZATIONS

Autonomous Infra

Self-Service

Lakehouses

Unified

AI enablement

Delivered

01

Earned Credibility

Advanced Tier + Competencies + Certifications + Successful Track Record

02

Blueprints, not blank pages

Proven patterns from real migrations - you don't pay for our learning curve

03

One partner, every layer

Design, build, migrate, operate - full-lifecycle capability, modular engagement

04

No lock-in, including to us

Open formats, your accounts, full handover - you can leave, which is why clients stay

05

AWS funding & commercial support

Funding programs. We help you access the budget AWS has allocated for exactly this journey

Thank you!
